Your Safety is our Concern™

Welcome to our 2015 Catalog

As you can see, we have revamped our catalog to make it easier for you to use. We have instituted a new RX reference system which will help you easily identify which RX types can be accommodated by each frame.

Progressive

Through our dedication to innovation, we have made a significant investment in Free-Form Robotic glass surfacing technology which allows us to provide anti-fatigue Single Vision, high definition Bi-Focal, and personalized Progressive prescription with up to a +4.50 add power.

Our partnership with Corning and their [Med-X®](#) line of 0.75mm Pb protective lenses enables us to offer you, our customer, the clearest vision possible while providing maximum protection. By adding the Oakley®  & Nike®  product lines to our catalog and the option for AR (anti-reflective) coatings to all of our available styles, our offerings in designs and materials cannot be surpassed.

We invite you explore our catalog to see these innovations and how we continue to set the standard for quality and customer service for Radiation Protective Leaded Eyewear.

Introducing Oakley® Leaded Eyewear

GASCAN

NEW FOR 2015

THE TACTICAL COLLECTION OUR MOST DURABLE & MISSION CRITICAL EYEWEAR PROTECTION POSSIBLE.

TACTICAL EYEWEAR COLLECTION

Superior Durability, Resistance, & Protection.

The Tactical Collection was developed out of an unyielding drive to defy convention & invent a better solution, by improving the safety, performance & comfort of all healthcare practitioners who work in fluoroscopic environments.

Our Corning Med-X lenses enhance the adaptability and acuity of the human eye while providing protection and comfort. These lenses strategically block the harmful rays of scatter radiation while providing the user with reduced eye fatigue and enhanced vision.

Offering uncompromising comfort, fit, form and function, the tactical collection allows the user to concentrate & stay focused while at the same time maximizing safety & comfort.

Engineered To Deliver Peak Performance In The Most Challenging Environments

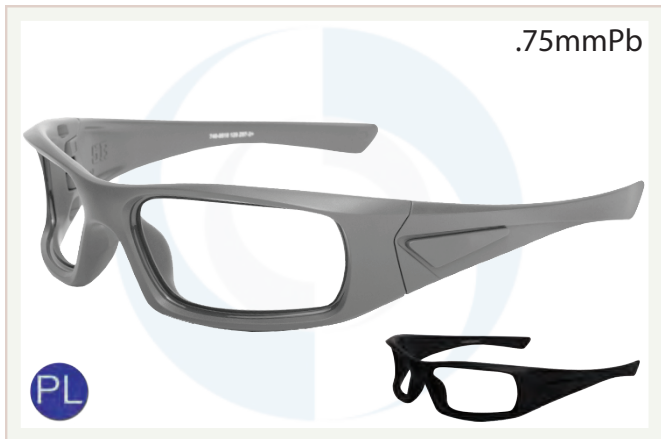

CHARGER

- Provides superior lateral protection & enhanced peripheral field of view
- Broad temple coverage for optimal side protection
- Low-profile temple arms for enhanced comfort
- Virtually indestructible thermoplastic frame
- Fits large & extra-large faces
- Frame Colors: Black, Grey

SABER

- Maximum wrap for enhanced lateral protection & peripheral field of view
- Unique frame architecture offers greater overall comfort
- Secure wrap temple arms and cam-action hinges that lock into place
- Fits medium to large faces
- Frame Colors: Black, Grey

JOLT

- Features cam-hinge temples for enhanced retention & a more comfortable fit
- Co-molded nosepiece and full wrap temple sleeves for maximum slip-resistance during perspiration
- Incredibly light, virtually indestructible reinforced nylon polymer frame
- Fits small to medium faces
- Frame Colors: Black, Desert Tan

VELOCITY

- The unique materials & geometries of this goggle afford the wearer superior splash protection, heat & impact resistance.
- Clear Zone Lens treatments provide an optimal combination of anti-scratch coating on the outside & anti-fog coating on the inside
- Low profile frame maximizes peripheral vision
- Full-perimeter ventilation and filtration minimizes lens fogging

ATOMIC

- Vented frame style prevents fogging
- Fits medium to large faces
- Rubberized coated anti-slip frame
- Weight: 60 Grams
- Lead equivalent Front Lens: .75mmPB
- Frame Colors: Black, Gunmetal

CIRCUIT

- Anti-slip rubber nose pads & temple tips
- Fits small to medium faces
- Available with or without side shields
