

The first choice for comfort and fit

Respironics PerforMax total face mask for single-patient use

The Respironics PerforMax supports comfort, may help minimize skin breakdown, and eliminates nasal bridge challenges by sealing around the perimeter of the face, where patients have less pressure sensitivity and smoother facial contours. The PerforMax also simplifies mask selection and speeds setup by fitting a wide range of patients with only three sizes.

Key advantages

- Pediatric to adult extra large size fits most patients
- Perimeter facial contact supports comfort and simplifies fitting
- The clear, unobstructed view provided by the PerforMax may help to reduce patient claustrophobia
