

Meeting the big challenge of little faces

Philips Respironics pediatric patient interfaces for noninvasive ventilation

PHILIPS
sense and simplicity

Specially designed for pediatrics

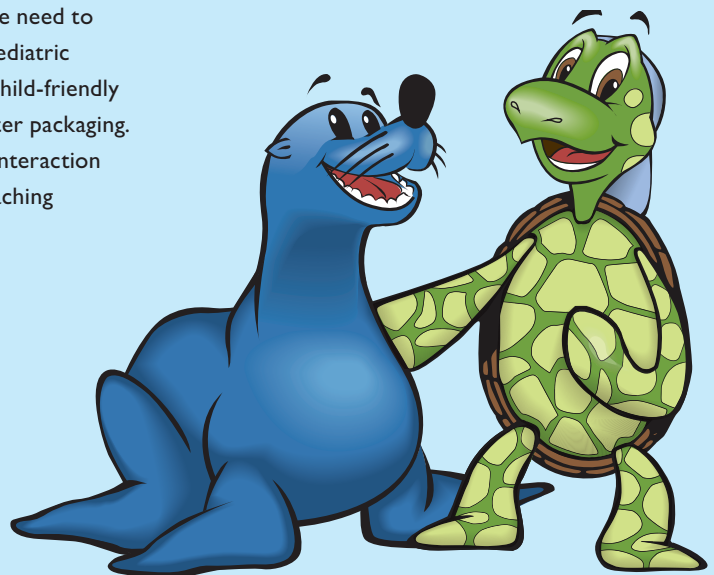

Facial size in pediatric patients can vary depending on many factors, including age, weight, and shape – one mask size or type does not fit all. Having the right interface solution for these patients can be challenging, but critical to the success of noninvasive (NIV) therapy. Philips Respironics meets that challenge by providing a variety of solutions specially designed for little faces.

Choose from:

- Nasal masks
- Total (full) masks
- Oro-nasal masks

Meet Sami and Tucker

Hospitals and medical procedures can be scary for pediatric patients. While every situation is unique, patient-clinician interaction can mean the difference between successful NIV and the need to intubate. To help ease patient anxiety, the PerforMax pediatric total (full) face mask xx small and x small sizes include child-friendly characters *Sami the Seal* and *Tucker the Turtle* on the outer packaging. The mask-themed images can be used for parent-child interaction or clinician coaching tools. If the situation permits a coaching opportunity, Sami and Tucker may just help out a bit.

Respironics PN831 nasal mask

For pediatric patients with respiratory insufficiency, the PN831 nasal mask offers an unobtrusive system to provide effective noninvasive ventilation.

Key advantages

- For pediatric patients 1 year or older and > 7 kg
- Gel cushion provides a gentle seal for sensitive skin
- Supports oral access and communication with caregivers
- Softcap headgear distributes pressure evenly over a large surface area for mask stability and comfort

The gel cushion on the PN831 provides a gentle seal for sensitive skin.

Respironics PerforMax total (full) face masks

With three sizes from which to choose, xx small, x small, and small, the PerforMax line of masks provides an NIV solution for your pediatric population. PerforMax allows for quick fitting and elimination of nasal bridge challenges. Total (full) face masks seal around the perimeter of the face where patients have less sensitivity and smoother facial contours. Along with Sami and Tucker on the packaging, the xx small and x small sizes have other child-friendly design features that address the safety, comfort, and compliance needs of your patients, including colorful bonnets with a soft inner lining, color matched clips, and a softer silicone material.

PerforMax XX Small

Key advantages

- For patients 1 year or older and > 7 kg
- Pink, blue, and yellow bonnet selection (shown on page 7)
- Cushion provides a sealing surface around the perimeter of face
- Available in single-use and multi-use configurations
- Compatible with single-limb and dual-limb noninvasive ventilators
- CleanClip supports infection control efforts (shown on page 9)

Compatible with a leak 2 entrainment elbow, (EE, amber), and standard elbow (SE, blue)

PerforMax X Small

Key advantages

- For patients 1 year or older and > 7 kg
- Pink, blue, and yellow bonnet selection (shown on page page 7)
- Cushion provides a sealing surface around the perimeter of face
- Available in single-use and multi-use configurations
- Compatible with single-limb and dual-limb noninvasive ventilators
- CleanClip supports infection control efforts (shown on page page 9)

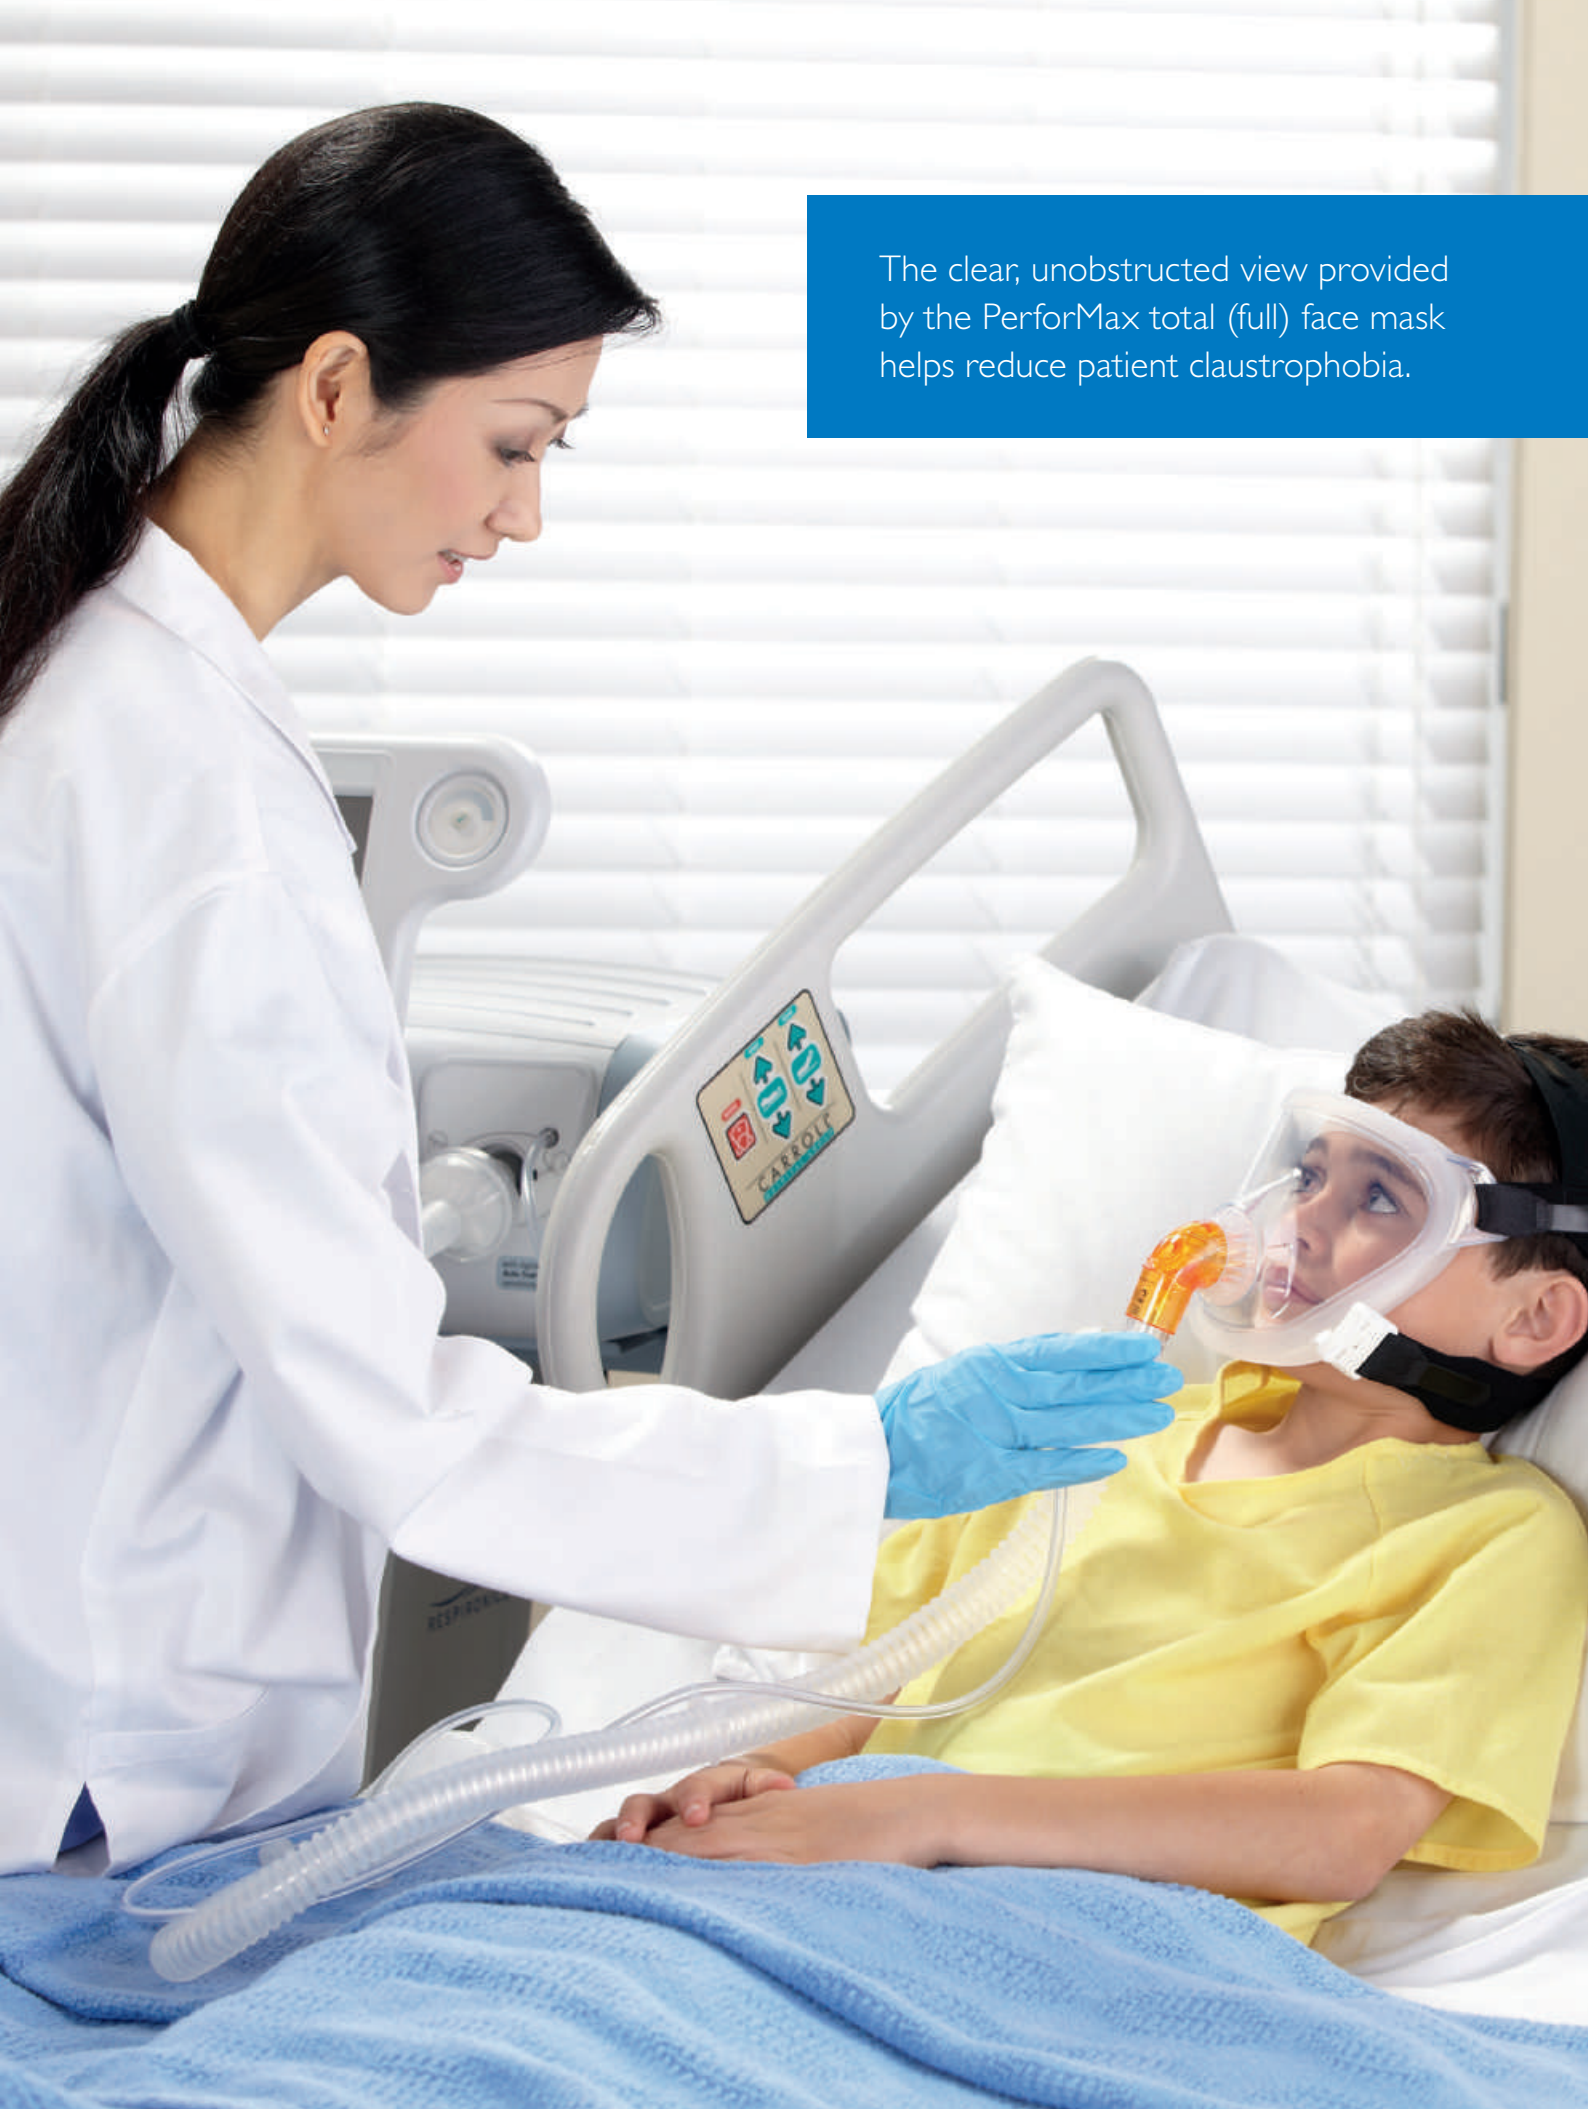

Compatible with a leak 2 entrainment elbow, (EE, amber), and standard elbow (SE, blue)

Packaging designed for kids

PerforMax pediatric total (full) face masks xx small and x small sizes include Sami and Tucker on the outer packaging. The mask-themed images can be used as a parent-child interaction tool, or a clinician coaching tool to ease the anxiety associated with wearing a mask.

The clear, unobstructed view provided by the PerforMax total (full) face mask helps reduce patient claustrophobia.

Mask sizing gauge

Each pediatric interface solution comes with its own sizing tool, either as a separate sizing gauge as shown here, or as part of the packaging itself.

PerforMax Small

Key advantages

- For patients 7 years or older and > 20 kg
- Cushion provides a sealing surface around the perimeter of face, avoiding contact with the nose
- Available in single-use or multi-use configurations
- Compatible with single-limb and dual-limb noninvasive ventilators
- Can be used with the bronchoscopy elbow for added versatility and function

Compatible with a leak 2 entrainment elbow, (EE, amber), standard elbow (SE, blue), and bronchoscopy elbow (BE, green)

Bonnets and headgear

The PerforMax pediatric total (full) masks xx small and x small sizes include bonnets and headgear that allow for increased comfort and simplified fitting. The bonnets have a soft lining made with a patented foam inner layer that allows for multi-directional elasticity. Available in three colors, bonnets come with matching captive clips.

XX small PerforMax
X small PerforMax

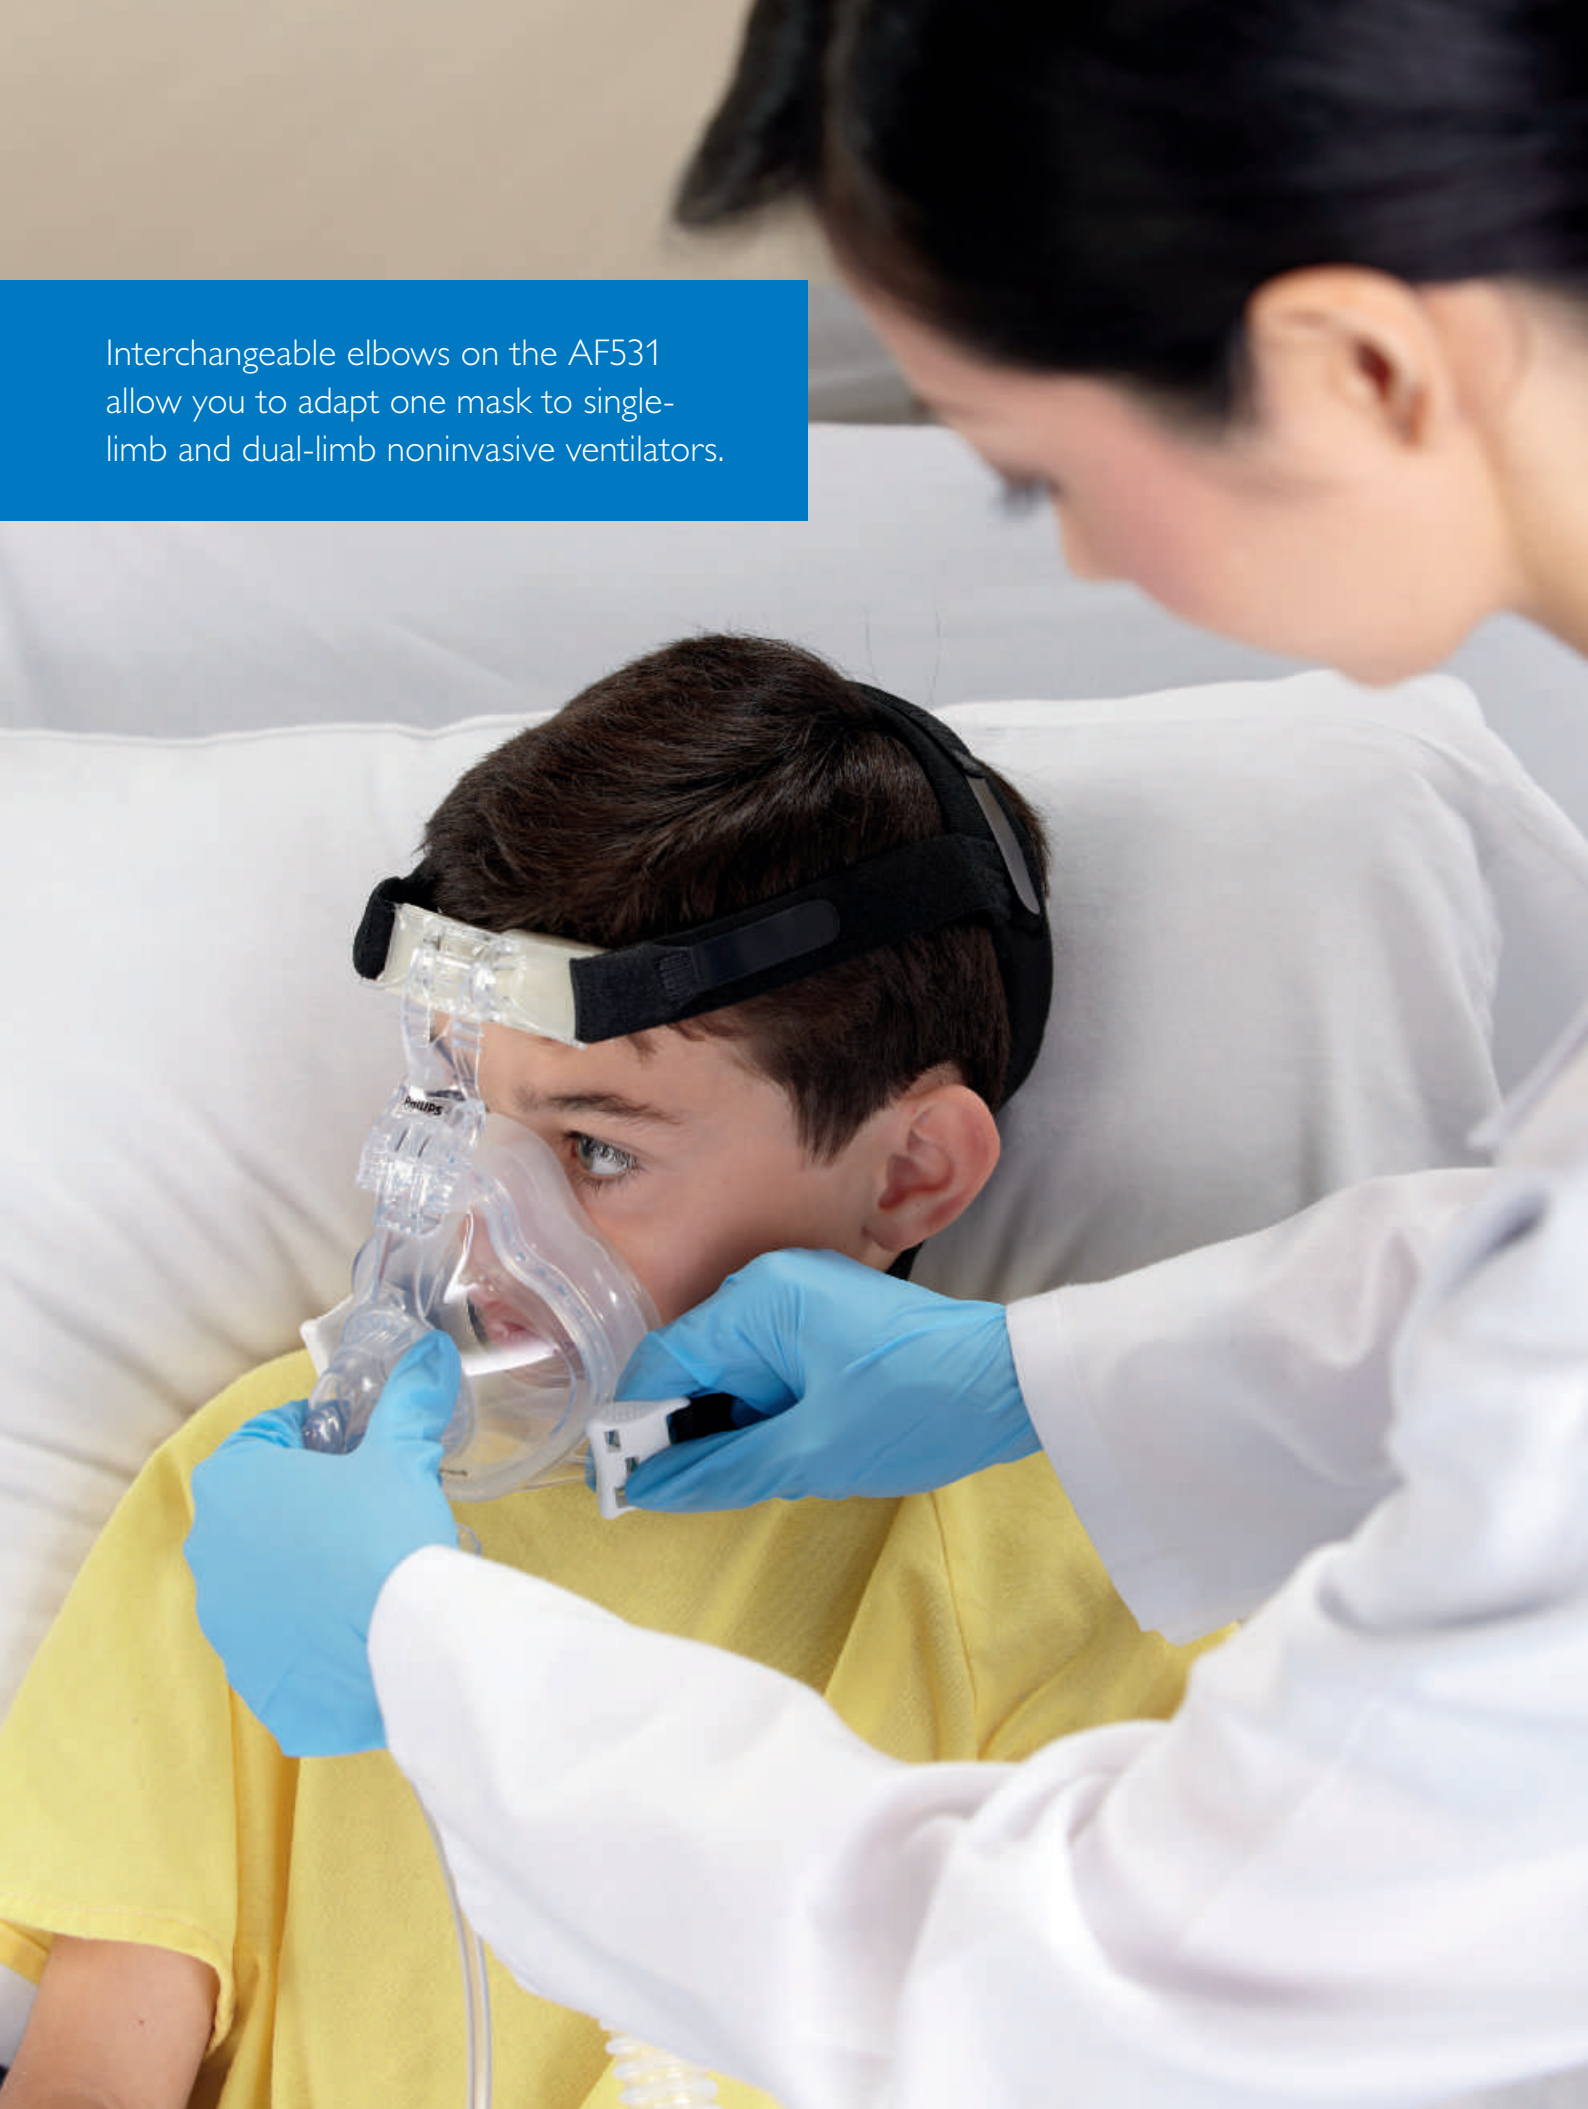

Small PerforMax

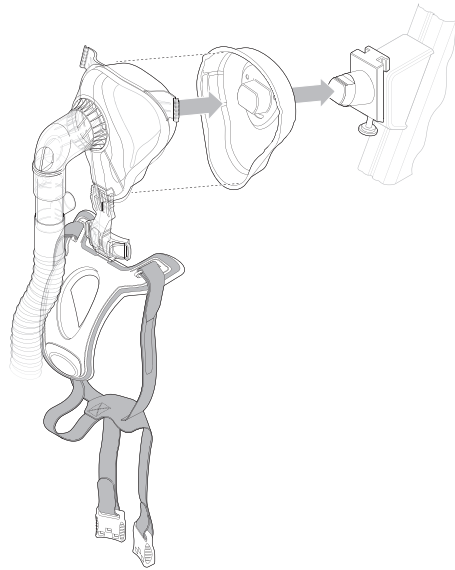

- Pink bonnet
- Blue bonnet
- Yellow bonnet

■ Four-point headgear
(Size small, shown on page 6)

Available in sizes small and petite.
Masks ship with size small.

Interchangeable elbows on the AF531 allow you to adapt one mask to single-limb and dual-limb noninvasive ventilators.

CleanClip

To help support infection control efforts, the CleanClip provides a clean place to store the mask when not in use. Available for the PerforMax pediatric total (full) face mask xx small and x small sizes and the AF531 oro nasal mask.

Respironics AF531 oro nasal

Oro-nasal masks are the standard of care for hospital NIV, and the Philips Respironics pediatric family of masks includes a selection of AF531 masks that address patient comfort, mask fitting, and expanded utility.

Key advantages

- For patients 7 years or older and > 20 kg
- Headgear provides excellent fit and simple re-application
- Can be used with the bronchoscopy elbow for added versatility and function
- Compatible with single-limb and dual-limb noninvasive ventilators
- Medication delivery capabilities with NIVO nebulizer
- CleanClip supports infection control efforts
